

Irrigation Design Seminar

*Irrigation Design —
a CEU program for
landscape architects*

Connecticut Chapter of the
American Society of Landscape Architects
87 Willow Street
New Haven, CT 06511

Thursday, March 22, 2007 • 8:30 a.m.-12:30 p.m.
Connecticut Agricultural Experiment Station
123 Huntington Street • New Haven

A Continuing Education Program of The Connecticut Chapter
of the American Society of Landscape Architects

Irrigation Design Seminar

Improved water management systems and practices as pertaining to irrigation design, product development and application will be explored in this four-hour course.

The challenges of meeting new irrigation design requirements will be addressed and cover such topics as:

- Meeting new state and local water usage regulations and codes
- Landscape materials with wide-ranging watering needs
- Sports turf liability issues and scheduling demands
- Watering efficiency through sensor and monitoring devices
- Control systems utilizing daily ET updates
- Updates on Central Control and Decoder Control Systems

Representatives from major Residential/Commercial Irrigation manufacturers will be on hand to present and discuss the latest in product developments specific to safety issues and water conservation.

Certified Irrigation Designers will provide updates on the latest in software design products and services including GPS and satellite imagery.

Subject material appropriate for CEU credits for landscape architects.
